

# **SPLIT WHEEL REPLACEMENT ROLLERS FOR SMOKEHOUSE CHAIN**

7/16" id X 1-1/8" od X .6"  
for 2082 chain

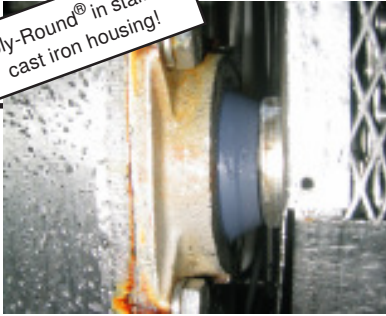

## **The original 2-piece dove-tailed split roller especially designed for continuous line conveyor chain**

- Replace broken rollers quickly and easily
- Allows re-use of stainless chain with simple in-house repair
- Remove worn roller and snap onto intact chain
- Reduce down-time
- Sanitary and easy to clean
- Ideal for HACCP programs

*Note: Polymer rollers will not survive continuous operating temperatures in excess of 200°F*

## Other continuous line conveyor components available from EDT Corp

Poly-Round® in stained cast iron housing!

4-bolt flange bearing for 2-3/16" shaft  
**Durable, non-corrosive, sanitary *POLYMER* housing  
with completely grease-less bearing**

**Option 1: polymer bearing in polymer housing** *OR*

**Option 2: stainless ball bearing (solid lubricated)  
in polymer housing**

NAIUI7-2-3/16

211-31-W

Old style!

Pillow block bearing for 2-3/16" shaft  
**Strong, stable, low-maintenance *POLYMER* bearing**  
Polymer bearings, either as a 1-piece block or in a self-aligning unit, withstand corrosive atmosphere and washdown.

New style!

PA1BI7-2-3/16  
block bearing

NA1GI7-2-3/16  
self-aligning bearing

*self-alignment usually extends bearing life*

### **"GREASE-LESS" bearings**

- *save money on lubricant and labor*
- *are more sanitary*
- *are more reliable in service*
- *have predictable replacement cycle*
