

Shown is 46" diameter 6-segmented seal that is used in processing of an edible product that is highly abrasive. This unit typically lasts 3 to 4 years.

- Segments allow for easiest storage, handling, removal, installation
- Variety of materials available for various operating conditions
- Outer- and inner diameters can be customized to requirements
- Custom cross sections
- Retrofit existing unit or EDT can design a solution for existing equipment
- As they wear, interchangeable segments can be turned, rearranged, or replaced individually or as a set
